There are two dome shaped rock kilns located about four hundred yards from "Casa Vieja" where lime was made during the construction of the house in 1848. Lime was made here from time to time whenever additions or repairs were needed.

There is also a picturesque stone archway which was built at the same time that spans a creek enabling the builders to carry lime from the kilns to the house.

This information was contributed by Mrs. Fred C. Goeth, Blue Wing Road, San Antonio, Texas.
